

4 Windows Continuum for Phones

Microsoft One of the coolest new features in Windows 10 for smartphones is the ability to actually use a Windows Phone as a full-fledged computer, once you hook it up to a screen.

You can even use a mouse and keyboard, if you're so inclined.

5 Microsoft Edge, the fast new web browser Microsoft Microsoft Edge is leaner, meaner, and faster than its predecessor, Internet Explorer.

Plus, it adds new features like the ability to scribble on and annotate web pages. You can even save pages for offline reading.
