

8 The new Start Menu

Microsoft The new Start Menu is everything I liked about the old one — quick access to files and settings — augmented by a very smartphone-like home screen, where I can pin apps and games for quick access.

It's the best of both worlds. And if you don't like it, you can always minimize it down to a start menu that's more Windows 7-esque.

9 It just works

Microsoft It's hard to get across in a single picture, but Windows 10 is intuitive and comfortable to use, while still working in all kinds of new ideas.

Every app, from videos to music to photos, has been revamped and gussied up for the modern era. I may or may not ever leave my Mac behind, but it's never been more tempting.
