Best Internet Browsers of 2019

By Ian Stokes February 04, 2020

22-27 minutes

The best internet browser isn't necessarily the default one that comes with your device. Whether you're looking for faster web browsing or more security while you're online, we'll help you choose the right internet browser in this guide.

After more than 80 hours of research and testing, we came to the conclusion that [Mozilla Firefox](#) is the best internet browser for most people. It boasts fast page loads, quick navigation and, most importantly, secure browsing. We tested each web browser's default security settings using live malware, and Firefox correctly stopped more malicious downloads – and warned of more dangerous websites – than any other popular web browser.

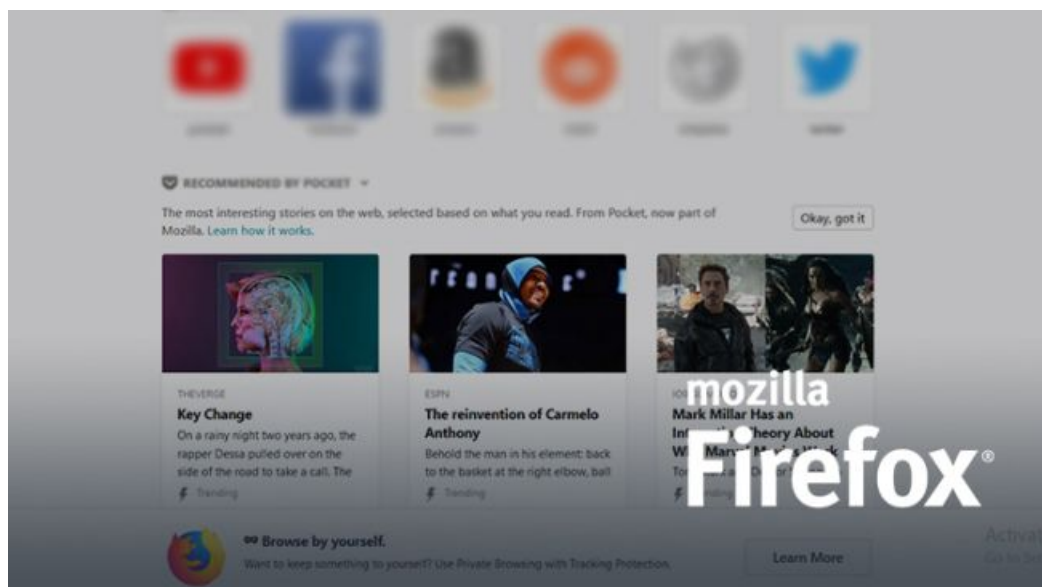

However, there are a number of very good browsers to choose between, and the right one for you will depend on your requirements. You'll find our pick of the best internet browsers below.

ExpressVPN: Save 49% | \$6.67/month (was \$12.95/month)

A VPN hides your data, and what you do online, from both your ISP and anyone else keeping track of your web browsing. ExpressVPN is our top-rated VPN and with this exclusive offer you can get it almost half price, at just \$6.67/month. [View Deal](#)
