Subject: AU Computer Club topics
Attachments: Potential Subjects for AU Technology SIG - 9-1-14.docx

Donald,

I saw your comment about topics in today's newsletter and sat down and came up with the attached list. These topics might be of interest to attendees at the AU Computer Technology Club. I realize that some of these may have been reviewed during past meetings. Full disclosure: I've never been to a club meeting so therefore I'm suggesting things blindly. You may be doing this, but the topics in the AU Science Club are explored in depth and therefore the subject can be somewhat narrow. Also, there is usually a detailed handout with good references and illustrations for those who want to go farther than the two hour meeting.

Hope this is of help.

Chuck
