

Creating a shortcut on Android Phone

The Home Screen on the Samsung Android phone:

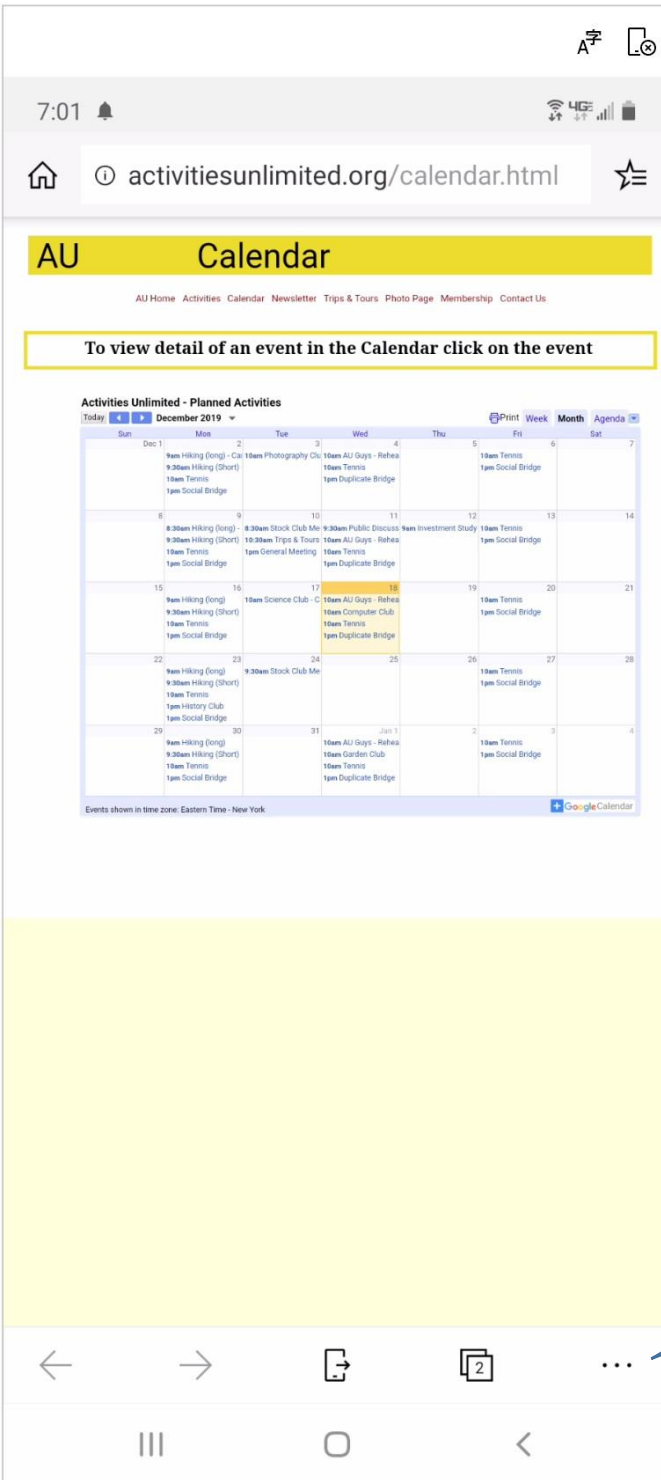

Install Microsoft Edge from the Google App store if not already on your phone.

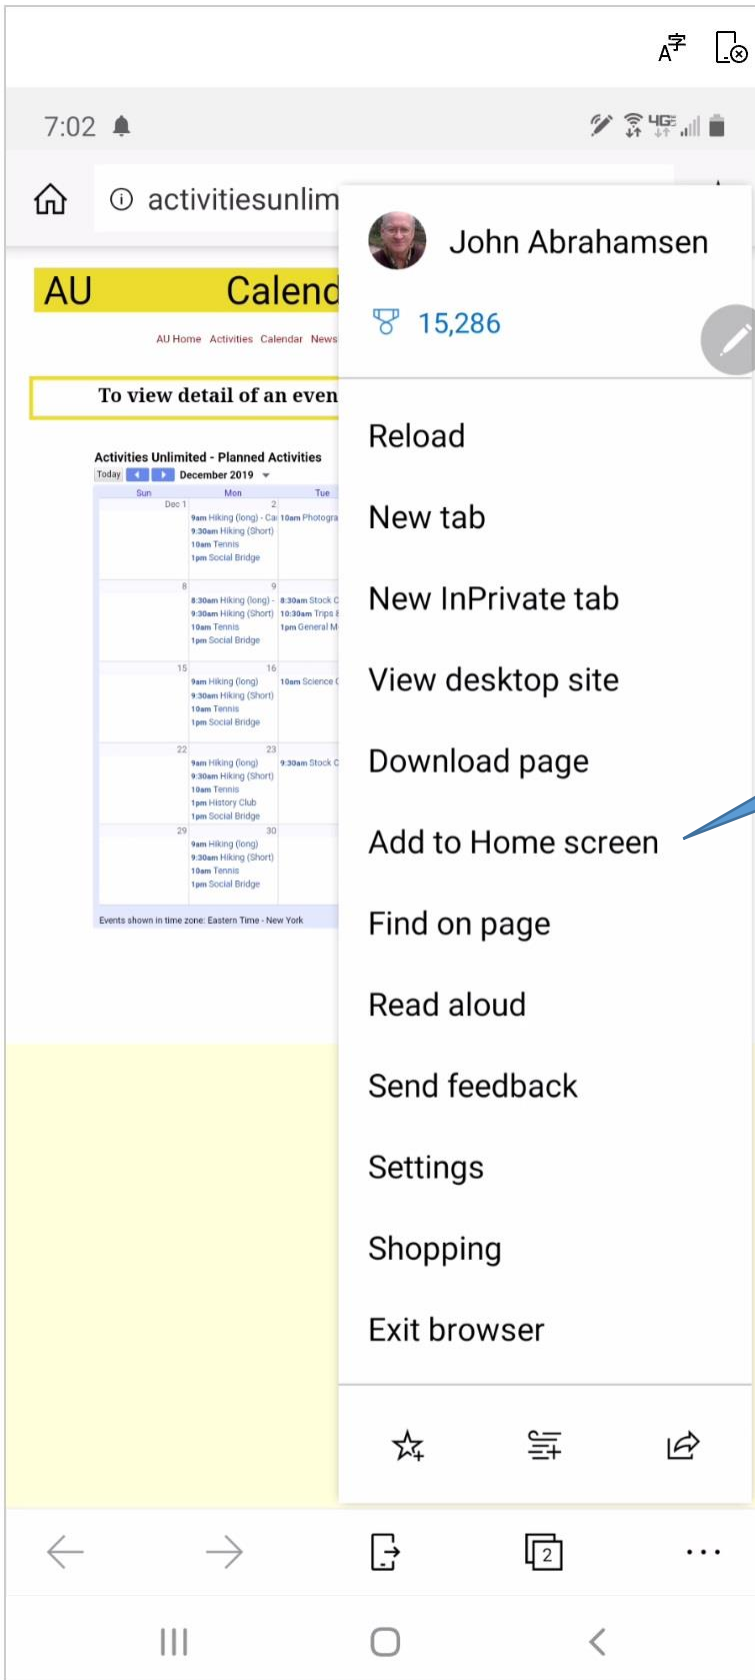

Tap Edge to launch the browser:

Then tap the menu item "Calendar". This step is not illustrated.

The next screen shows the list of settings on top of the calendar

- Exit browser

Tap the menu item
Add to Home screen

My number 1 home screen was full so I had to look for the shortcut and found it on home 2.

Swipe screen to see new shortcut

Whenever you wish to visit the AU calendar page just tap this shortcut (Calendar).
