Subject: Subject for next Computer meeting

Hearing of lots of scams on computers, and phone calls. ie, SSA scam problems.

Question, for computers, is there a way to cleanse an active computer?

My step father fell for a scam, and finally hung up, they did something to his computer, so it would not work! He had to go to Best Buy Geek Squad to get it repaired.

But for those of us who have normal McAfee, like me, what else can I do?  
Plus normally Apple does a good job of stopping and filing up Scam file.

But my wife isn't so luckily with AOL,,a lot of scam emails get through!
