

How do I find my public IP address

On any PV or device you can use your Internet browser to find the IP address. So this works for both Windows and Apple devices. Included in this paper is the same task shown in different popular browsers. Search for “my ip”

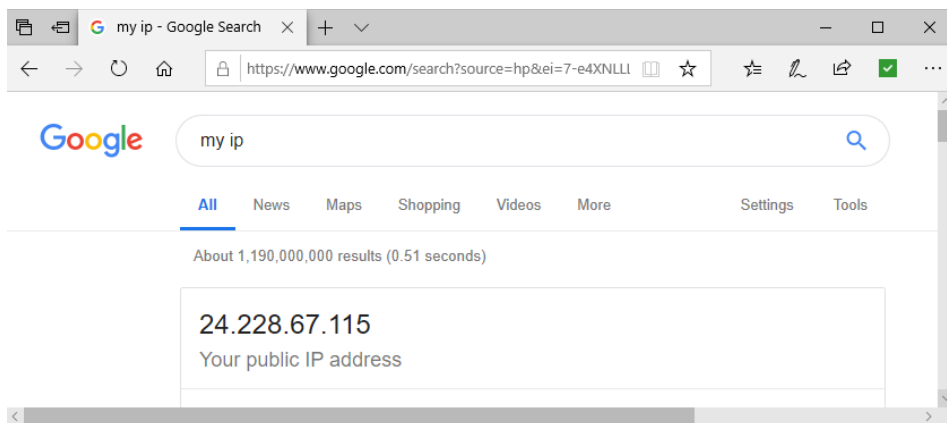

MS Edge using Bing search engine

Google Chrome using Google search engine

MS Internet Explorer with Google search engine

NOTE: some search engines do not work (see next page)

MS Edge using Yahoo

The screenshot shows a Microsoft Edge browser window with a single tab titled "my ip - Yahoo Search Results". The address bar contains the URL "https://search.yahoo.com/search?p=my+ip&fr=yfp-t&fp=1". The search bar contains the text "my ip" and a blue search button with a magnifying glass icon. To the right of the search bar is a "Sign in" link. Below the search bar are navigation tabs for "Web", "Images", "Video", "News", "More", and "Anytime". The search results section includes a suggestion: "Also try: what's my ip address for this computer". Below this is an advertisement with the text "Ad related to: my ip" and a link titled "Whats My Ip Address | Whats My Ip Address" from "searchenterpriseai.techtarget.com/AI". The ad text states: "searchenterpriseai.techtarget.com has been visited by 100K+ users in the past month. Learn how analyzing your data center can help perfect your AI-defined infrastructure."
