

pages at a time.

## What uses are best for a laser printer?

You should get a laser printer if you print high volumes of black and white documents.

Laser printers can print much faster than inkjet printers can. Most are equipped with high-capacity paper trays, so they can print more pages at a given time. They're also built to handle the printing of thousands of pages per month without succumbing to wear-and-tear.

Laser printers don't print color photos as well as inkjet printers do. They can print basic photos for everyday use, but they're not built to print gallery-quality photos. For that reason, they're not optimal for photographers or designers.

Laser printers are larger and heavier than inkjet printers, which makes them difficult to fit in a home office (although some models come in a more compact size). But they're very well suited for office use due to their high printing capacity.

## Which HP Laser and Inkjet Printers are Great Values?

### 1. HP OfficeJet 5255 All-in-One printer

The [HP OfficeJet 5255 all-in-one printer](#) is an inkjet printer that's great for photo printing. It can print borderless images on a variety of different paper sizes. The OfficeJet 5255 AiO printer has wireless capabilities and is compatible with HP Instant Ink.

### 2. HP ENVY 5055 All-in-One printer

The [HP ENVY 5055 AiO printer](#) is an inkjet printer that can print borderless images at a very high color resolution. It has great wireless capabilities via the HP Smart app and Bluetooth Smart technology.

### 3. HP LaserJet Pro M102w multifunction printer

The [HP LaserJet Pro M102w multifunction printer](#) is a laser printer that's compact enough to fit comfortably in a home office. The paper tray can hold 150 sheets and it can print 23 pages per minute in black and white. It's one of the most budget-friendly laser printers on the market.

### 4. HP LaserJet Pro multifunction printer

The [HP LaserJet Pro multifunction printer](#) can perform a variety of tasks, as the name implies. It can copy, scan, and print color images, and it can print black and white documents at a speed of up to 42 pages per minute.

## In summary

Once you have decided on which type of printer is best for you, then you can narrow your selection based on factors like multifunction capabilities and color printing. Your printer is vital to your work or school success, so make sure you get the one that will best suit you, whether it's an inkjet or laser printer.
