

## Personalize Your Display Screen

Where do you go to add or remove a printer? The control panel does that and more. This document does not cover all the functions but does discuss the following (see Appendixes):

- A. Setting the printer default.
- B. Checking the printer queue and removing a print job from the queue.
- C. Testing the printer.
- D. Adding and removing printers from your PC.
- E. Setting certain features of the printer as the default used by programs.

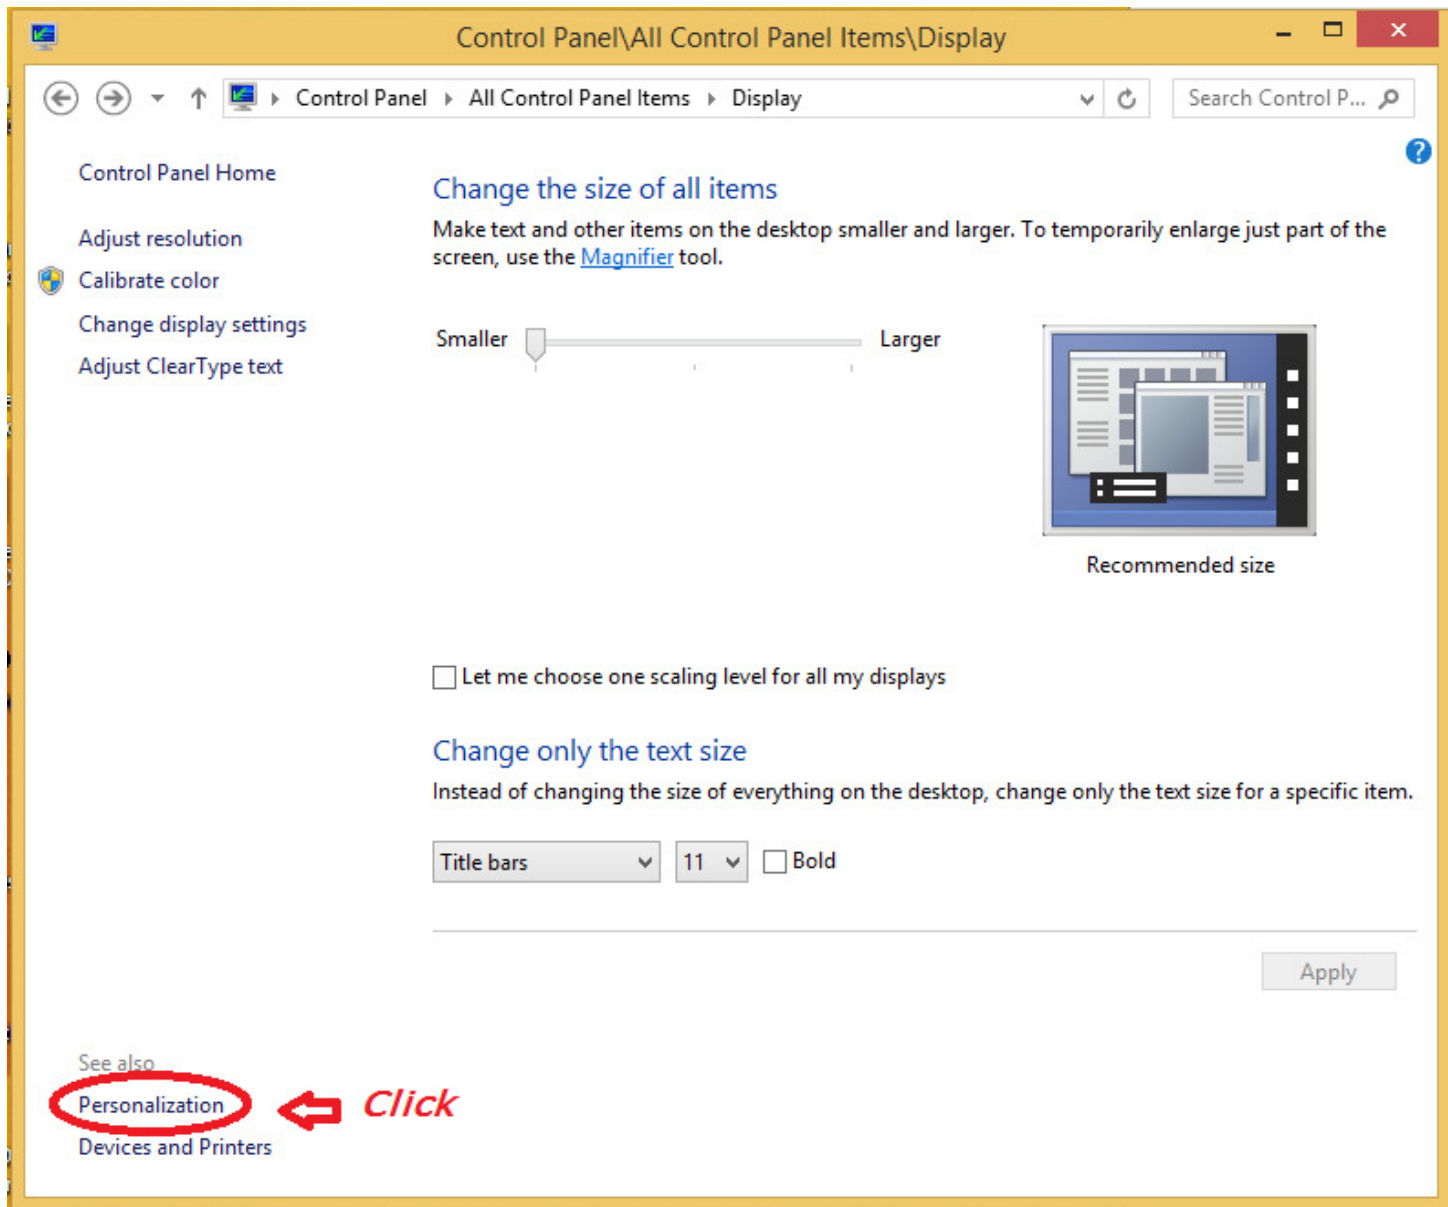

### To start

Launch the Control Panel:

Click on:  Display

This will display the Display window as follows:

Then click Personalization:

Which will display the Personalization window:
