

# System requirements for Windows 11

Your device must be running Windows 10, version 2004 or later, to upgrade. Free updates are available through Windows Update in Settings>Update and Security.

- **Processor** 1 gigahertz (GHz) or faster with 2 or more cores on a compatible 64-bit processor or System on a Chip (SoC).
- **RAM** 4 gigabyte (GB).
- **Storage** 64 GB or larger storage device Note: See below under “More information on storage space to keep Windows 11 up-to-date” for more details.
- **System firmware** UEFI, Secure Boot capable. Check here for information on how your PC might be able to meet this requirement.
- **TPM** Trusted Platform Module (TPM) version 2.0. Check here for instructions on how your PC might be enabled to meet this requirement.
