

the roster without pictures has larger size letters to make reading easier.

a larger font cannot be used in either report because we don't want to leave anything unreported as well as keeping down the number of pages printed.

Also, the PDF automatically reduces the size of the font so that when you print it, it will be harder to read. However, we do not feel making the excel version available is a solution. The PDF lets more people use it. So the tradeoff is smaller size print.

For anyone who is struggling with the size of the printed report, **I suggest not printing it.** Just open it on the screen. You can search for a member by name. **And** the PDF reader has a **magnify feature.** You can enlarge the report to as big a size as is needed.
